

SECURITY CONSULTING & SOLUTIONS

Today's security environment is increasingly complex with concerns ranging from terrorism to drones to cyber threats. Well-designed executable processes and protocols are critical to the successful execution of daily facility operations as well as maintaining resiliency in the face of crisis. We will work with your team to evaluate and improve existing systems or if desired support from design through implementation.

SkyBridge TACTICAL

ABOUT US

We exist to help our partners build and deliver the safest and most secure sport, live entertainment, retail, and commercial ecosystems throughout the globe.

SkyBridge Tactical partnered with FX Entertainment Security combines the knowledge and expertise of counterterrorism experts, leaders in safety and security, and best in class venue operators to deliver world class solutions to world class clients.

- ★ Targeted Requirement Execution (Subcontractor)
- ★ Granite Creek Range Complex

ENTERTAINMENT SECURITY

For new government contracting efforts, SkyBridge Tactical leverages its experienced pool of professionals and consortium of large and small industry partners to enhance and augment teams.

SkyBridge Tactical provides specialists in operations, logistics, engineering, training, integration, and fielding as integral members of your team.

SkyBridge Tactical partnered with FX Entertainment Security provides intelligence that

informs your decisions. The collection of data and information is a laborious undertaking. For the untrained, it frequently generates 'white noise' and distraction.

Our product sources information specific to the unique risks facilities face. By understanding your needs, we can evaluate relevant information against targeted objectives to provide your team intelligence that drives decision-making.

PREVENTION & RISK ANALYSIS

Consideration of internal and external risk factors evaluated against existing processes and resources can provide facility managers unique insight into their operations. We can assist in addressing these factors along with today's volatility and change to assist you in the prioritization of your future objectives.
